

Enterprise-wide visibility of your Microsoft 365 End-User and Administrator Activity

The Synergy Enterprise Visor (E-Visor) solution provides advanced reports, notifications and alerts, and defense actions focused on the activities of end users, administrators, devices, applications, and information to help you to monitor and protect your sensitive assets and cloud applications.

Report Category	Description	Examples
General Activity	Set of reports that shows general information about your users, devices, applications, and the use of your protected documents.	<ul style="list-style-type: none"> ✓ Active Users ✓ Devices ✓ Application used ✓ Information Access
End-User Workload Activity	Investigate individual user behavior to enable legal hold scenarios. Identify compromised user accounts and react to malicious activity.	<ul style="list-style-type: none"> ✓ User Access Details ✓ Device Details ✓ Location Details ✓ Performed Activity Details
Admin Activities	Audit administrator access and configuration changes to your Microsoft 365 services. Verify privileged accounts are not compromised or misused.	<ul style="list-style-type: none"> ✓ Administrator Access Details ✓ Location Details ✓ Performed Activity Details
Service Configuration	Evaluate ROI of cloud services, based on organizational usage. Verify service configuration, even across multiple tenants.	<ul style="list-style-type: none"> ✓ Active Features ✓ Usage

E-Visor is the answer to your Compliance and Incident Response needs

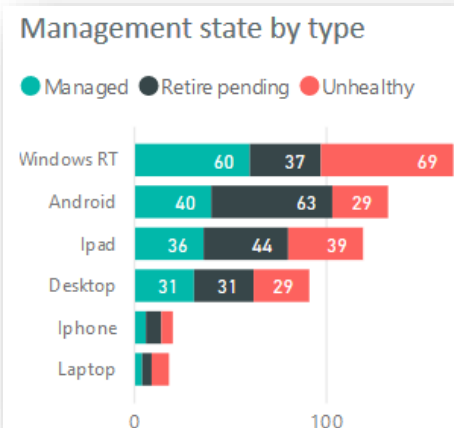

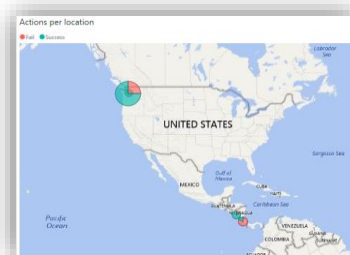

Unique users and activity by application breakdown

Application	Unique Users	Count of Attempts
Graph explorer	2	488
Microsoft Office 365 Portal	23	215
O365 Suite UX	21	203
Azure Portal	17	168
Office 365 Exchange Online	20	152
Office 365 Suite Shell	16	97
Office 365 SharePoint Online	18	76
Skype Web Experience On Office 365	12	64
Microsoft App Access Panel	18	54
OneDrive SyncEngine	19	54
Total	49	1926
