

# E - Vigilant

## Data Loss Prevention Analytics and Management

When deploying Data Loss Prevention policies, oftentimes the number one objection comes from the IT Department. Their inboxes suddenly become flooded with alerts and managing the service becomes overwhelming.

**Synergy's E-Vigilant** gets your business involved and relieves pressure from your IT Department, empowering managers and their teams with a hands-on approach on sensitive data.

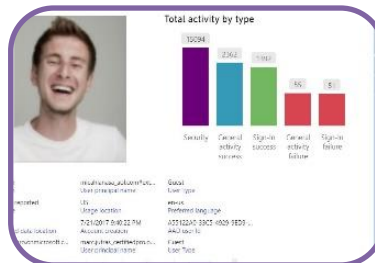

Our robust rules engine and integration with Power Platform unleashes powerful response capabilities to optimize your DLP platform by reducing false positives and surfacing malicious incidents while reducing costs.

Get managers involved and empowered

Business-driven decisions

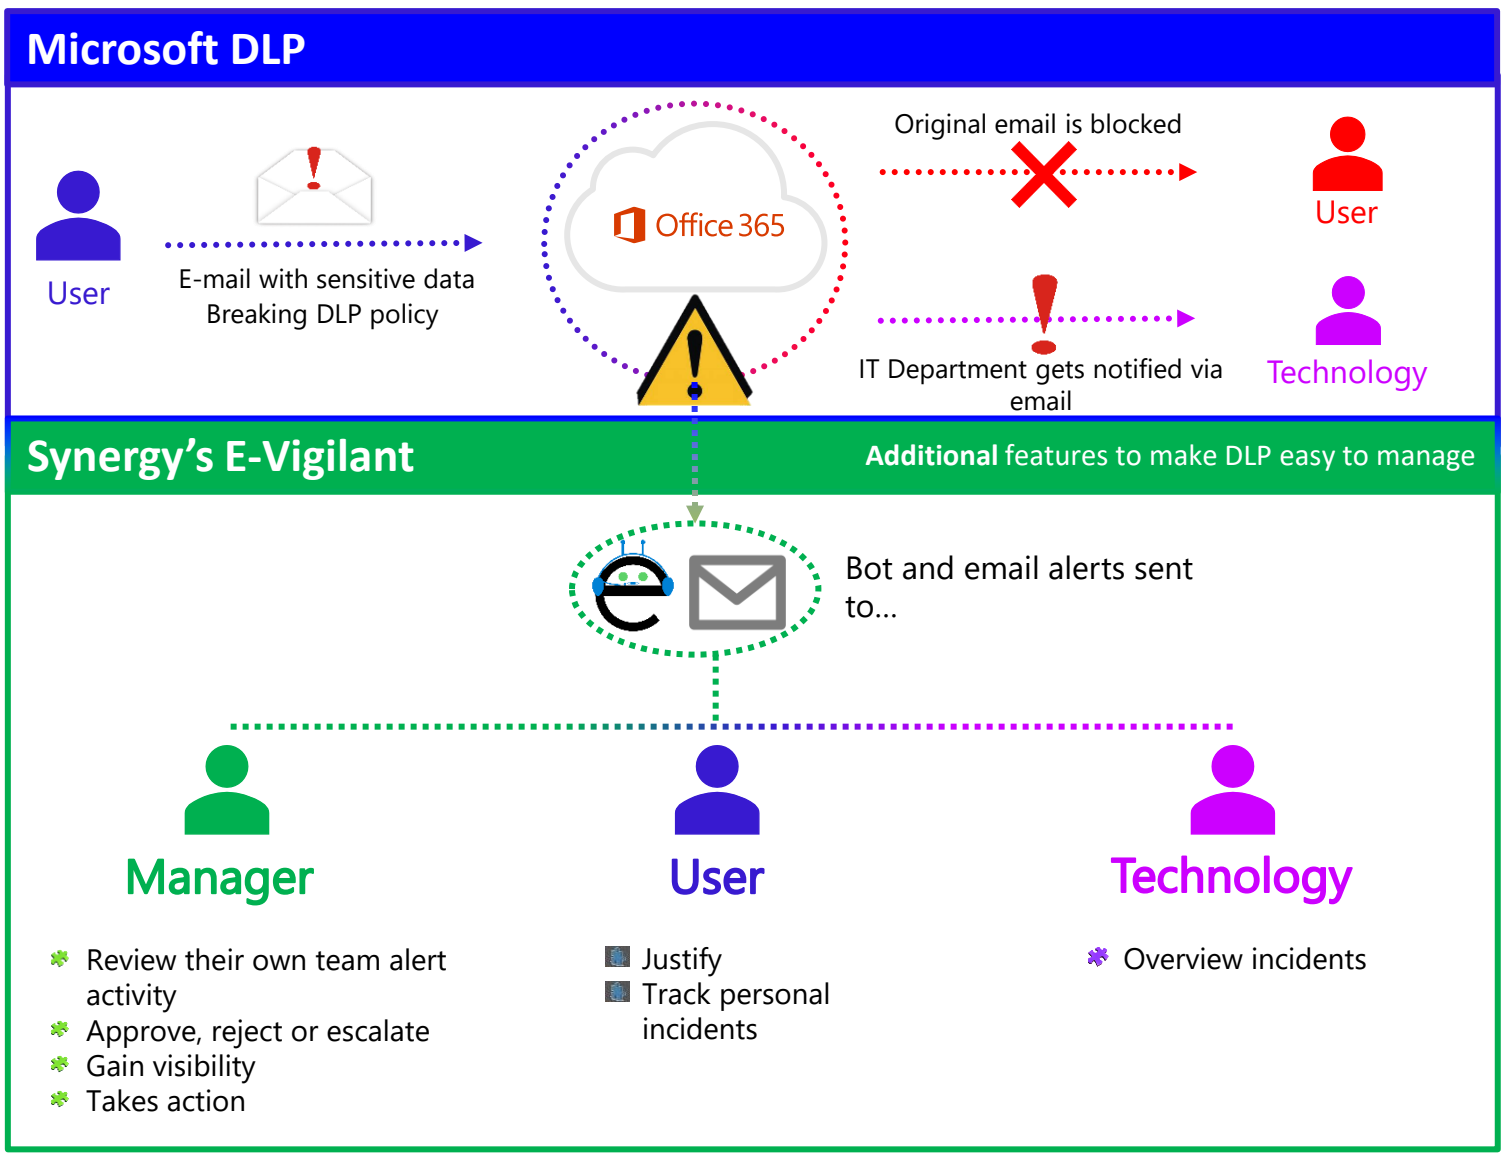

Smart tracking with advanced analytics

Interactive bot directly within Teams
