Technology
Efficient and tested tools

=

Best of two worlds
Quick and impactful results, tailored to your organization

Move fast and achieve impactful results for the entire organization

We provide valuable and uniquely tailored findings for IT and Business decision makers

Do you know which user accounts have been compromised?

Security

Endpoint protection Mitigate exposures, threats, and malware

E-mail protection Prevent phishing and end user exploits

Do you know who is accessing your sensitive data?

Compliance

Data at rest Discover and protect sensitive data

Data in transit Prevent data loss by acting in real time

Do you know how, when, and where your resources are being accessed?

Identity

Identity Protection Avoid stolen credentials and identity threats

Identity Governance Grant the right people access to the right resources

What is your current on-premises uptime and software update cycle?

Cloud Migration & Optimization

End-to-end digital transformation migration assistance for:
- **Optimized Collaboration** using Microsoft 365
- **Modern infrastructure** using Azure

E-Suite Discovery Offerings

Security

E-Mail Protection

E-Mail is your most common vector for attack. An end-to-end view of your e-mail activity, risks, and configuration is fundamental to understand and mitigate threats.

2M

Phishing links are created and sent via email each month

Microsoft Digital Defense Report 2020

Malware, spam, and sophisticated phishing attacks are rising rapidly, but how can you effectively reduce these risks knowing that, no matter how hard you try, as people come and go, you will have exposure to human mistakes?

We can help you quickly understand how to optimize your antispam and anti-malware controls to protect against complex attacks, via the latest protection technologies

Phishing

The most used and dangerous vector attack. 1.9B blocked last year

Malware

Even PDF's may contain malware

Spam

Sand trap for productivity

Endpoint Protection

Provide end-to-end protection for your devices with a multi-layered strategy, including user involvement, to significantly increase endpoint security

68%

Of IT professionals found that the frequency of endpoint attacks had increased since the previous before.

Ponemon Global Encryption trends 2021

Endpoint management and security has gone beyond your network and dealing with sophisticated cyber threats presents quite a challenge. Informing IT and cyber security about potentially compromised devices is not enough; educating and alerting end users once a potential issue occurs is critical.

We can help you simplify your end-to-end device health strategy and engage your end users to reduce help desk calls while strengthening your security posture

Notify users

A user who does not know if their devices are compromised is a risk vector

Empower users

Educated end users can take the right action at the right time, saving help desk resources

Involve users

Every user needs to be a brick in the firewall

E-Suite Discovery Offerings

Compliance

Data at rest

Discovering what type of data, where it is located, and who accesses it in your organization is the most effective first step to develop a protection and mitigation strategy.

2700 files

Exfiltrated by former employee of Hardwire LLC protective armor company. With the stolen information, he wins a multi-million dollar contract.

Maryland Court

Even at rest, your data is dynamic with multiple servers and locations, multiple access vectors and actors, multiple copies of the data, and multiple administrators. Keeping control is complex.

We can help you build an inventory and analysis of your data at rest to establish a data protection and mitigation plan

Content Type

Discover what kind of sensitive information you have and where it is.

Access

Understand who is accessing your sensitive information and in what way.

How to protect

High-level action plan to optimize your security controls.

Data in transit

Secure collaboration is vital for the success and growth of the business. Understanding the flow of data in real time, classifying, and prioritizing enables IT and the business to react quickly.

8000

Sensitive files were exfiltrated by a General Electric employee in 2020.

FBI

Over the past two years, the number of accidental data loss and deliberate data exfiltration incidents by negligent or disgruntled employees and contractors increased by 47%.

We can help you validate your existing data usage and controls while educating users about how to protect your business information

Educated users

Empower users to better protect your information.

Involved managers

Involve business owners in the resolution of high-priority incidents.

Agile alerts and flows

Modern alerts and notifications about a potential data breach.

E-Suite Discovery Offerings

Identity

Identity Protection

The use of artificial intelligence, together with other risk meters, mitigates the effects of credential theft and other attacks. We accelerate rapid reaction and engagement by involving the end user and the organization in potential risks.

5.2M hotel guests' data was stolen using login credentials of two Marriott employees in the past year.

Marriott International

We can help you review your end-to-end identity protection story, across both cloud and on-premises

Risk-based security

Access decisions based on machine learning.

Notify users

Security risk and threat notifications.

360-view for users

Inform the user about identity risk events

Identity Governance

Maintain secure and up-to-date access to systems for internal employees, contractors, and partners.

1000 Twitter employee accounts with privileges to update user accounts were linked to the 2020 hack

Managing end-to-end identity and access is a must today, across both partners and internal employees.
One of the most critical vector attacks and potential risks comes from access granted to vendors and other external users via Business to Business (B2B) scenarios.

We can help you enable an agile way to manage access to different business applications and resources in your organization

End user

Improved user experience for self service access.

Approver

Efficient and timely way to provide access to users.

Revoke access

Flow to ensure that permits are kept current

E-Suite Discovery Offerings

What is in scope?

Review

A security expert will review your needs and environment

Install and Process

E-Suite and Microsoft tools
No premium licenses required
Your information never leaves your tenant

Findings and action plan

After review, we leave you with the reports and an action plan, customized to your insights

Time

Total Time: 1-2 weeks.
Findings and expert analysis

Required client time: ~8-16hs across four meetings

How does E-Suite make the difference?

E-Suite

Analytics

End-to-end analytics for the enterprise

Data Governance

Integrated information collaboration lifecycle

Optimized Operations

Intelligent alerting and notification services

Give your organization the power to discover, govern, protect, and report on your most sensitive information across Microsoft 365 services. **E-Suite** is a collection of four services, **E-Visor, E-Cryptor, E-Inspector** and **E-Vigilant** designed to help you discover, audit, and govern your most sensitive information and resources.
