

Synergy Advisors – Copilot for Security PoC-in-a-box

A Next-Gen AI-Powered Security Solution for Enhanced Efficiency and Capabilities of defenders to improve security outcomes at machine speed and scale.

Synergy Advisors is thrilled to introduce an innovative solution tailored specifically to enhance your organization's security infrastructure: the Copilot for Security PoC-in-a-box. This comprehensive engagement program is meticulously crafted to not only provide cutting-edge technology but also empower your team with the expertise necessary to fully leverage the capabilities of Microsoft Copilot for Security [CfS].

Copilot for Security PoC-in-a-box overview

Within the Copilot for Security PoC-in-a-box, we extend an array of services meticulously designed to fortify your security infrastructure. From proactive threat detection to strategic vulnerability assessments, our offerings are geared towards empowering your organization with robust defense mechanisms against evolving cyber threats. [Up to one week]

Scope

- Evaluate and validate your use cases and requirements in an isolated lab environment.
- Implement use case scenarios for two core technologies/plugin [Up to 2 use cases].
- Enable and configure required plug-ins.
- Implement one automation workflow for a use case scenario.
- Create and implement promptbooks based on use case scenarios [up to 2 promptbooks].
- Copilot for Security knowledge transfer sessions.
- Best practices for prompting and prompt enrichment (prompt engineering) with knowledge bases.
- Copilot for Security usage monitoring during PoC-in-a-box phase, providing an estimation of SCUs required for production.
- Findings and recommendations.

Deliverables

- **Knowledge transfer**
 - Describe recommended practices and lessons learned.
- **Working Sessions**
 - Solution design discussions
 - A high-level presentation about how Copilot for Security can achieve the unique security needs of the organization.
 - Synergy Advisors' recommendations.
- **Document Deliverables**
 - High level design
 - A presentation about how Copilot for Security can achieve the unique security needs of the organization.
 - Hands-on Lab (HOL) Guide
 - A step-by-step document outlining how to validate the identified use cases in the lab environment. Focused on specific requirements for your organization.
- **Lab environment**
 - An environment representative of your proposed architecture and access to a Synergy-hosted lab environment.

What's Included in this PoC-in-a-box

Crafted with a keen focus on augmenting your security infrastructure, this offering represents a pivotal step towards maximizing the potential of Microsoft Copilot for Security. Our tailored approach ensures that your organization receives not only cutting-edge technology but also personalized assistance, empowering you to navigate the ever-evolving cybersecurity landscape with confidence and efficiency.

Evaluate and Validate Use Cases and Requirements

We work closely with you to understand your specific requirements and use cases. This helps us tailor the engagement to your needs.

Implement Use Case Scenarios

Implement use case scenarios for two core technologies/plugin-ins, providing hands-on experience and practical knowledge.

Implement Automation Workflow

We help you leverage Copilot's automation capabilities to streamline your security processes, using a specific use case as an example.

Create and Implement Promptbooks

Create and implement up to 2 promptbooks based on the use case scenarios, providing a practical guide for your specific requirements.

Copilot for Security Knowledge Transfer Sessions

Conduct up to 4 knowledge transfer sessions to ensure the organization has a comprehensive understanding of Copilot for Security and its capabilities.

Best Practices for Prompting and Prompt Enrichment

We provide strategies and best practices for prompting and prompt enrichment with knowledge bases, enhancing the effectiveness of Copilot for Security.

Additional information

- This Engagement is tailored for technical decision makers, and IT professionals.
- Experience in managing Microsoft 365/Azure Security solutions for cybersecurity incident management scenarios.
- Technical support and guidance will be provided throughout the PoC-in-a-box session.

[LEARN MORE](#)

If you want to take your organization's security and compliance posture to the next level, if you are taking your first steps and want to quickly assess this technology as you progress along your path, we offer the following options:

Hands-On-Lab [HOL]

Step into the realm of advanced cybersecurity with our hybrid **Hands-On-Lab [HOL]** experience, where we delve deep into the transformative capabilities of Microsoft Copilot for Security. Join us as we embark on a journey to revolutionize your SecOps strategy through the power of AI-driven insights and recommendations. [LEARN MORE](#)

Architecture Design Sessions [ADS]

The Copilot for Security ADS is a 1.5 to 2-day workshop involving key stakeholders. It focuses on designing, operating, and implementing Copilot for Security, including knowledge transfer on best practices, and understanding your current environment to identify requirements. Additionally, it offers insights into common scenarios and unique use cases. [LEARN MORE](#)

Pilot

The Copilot for Security Engagement is a high-level session to prepare your organization for Copilot deployment. It involves evaluating readiness, reviewing usage and integration, validating use cases, implementing scenarios, configuring plug-ins, and providing knowledge transfer sessions on best practices. Why choose Synergy Advisors as your strategic partner?

At Synergy Advisors, we not only provide consulting and managed services but also accompany you every step of the way on your journey to digital excellence across Microsoft products and our solutions (**E-Suite**), which amplify the power of your existing M365 and Azure investments. We are dedicated to driving your digital transformation, creating a more secure and efficient collaborative infrastructure. How do we achieve this? Through a unique blend of consulting expertise and managed services, we focus on your specific needs, offering comprehensive solutions that address both your security concerns and regulatory requirements.

Consulting Services

+12 years, +100 Top customers, and, with specializations in Security, Modern Work, Azure Data & AI, and Azure Infrastructure

We support our customers in the correct implementation of Microsoft solutions, aimed at improving their security postures and Modern Work, accompanied by a strategy that seeks to increase the adoption of these technologies and generate more upsell and cross-sell projects.

Managed Services

Leverage cybersecurity experts to review and monitor organizations' Microsoft 365 and Azure infrastructure and security. In-depth assessments of cloud applications, deployments as we help draft prioritized plans for improvements based on organizations unique security goals. Highly trained staff who monitor end-user activity through robust log analysis to provide you reliable monitoring, proactive and reactive incident response, and troubleshooting

Solutions (E-Suite)

Synergy Advisors' **E-Suite** seamlessly integrates various products with Microsoft 365, extending its features to address common advanced use cases encountered in organizations we've partnered with.

- E-Visor
- E-Visor Teams App
- E-Inspector
- E-Cryptor
- E-Vigilant
- E-Migrator
