

# Synergy Advisors Security Engagement (Pilot+) for Microsoft Copilot for Security

A Next-Gen AI-Powered Security Solution for Enhanced Efficiency and Capabilities of defenders to improve security outcomes at machine speed and scale.

Synergy Advisors introduces an innovative solution tailored to bolster your organization's security infrastructure: the **Synergy Advisors Security Engagement (Pilot+)**. This engagement program is meticulously crafted to empower your team with the expertise needed to harness the full potential of Microsoft Copilot for Security [CfS].

## Synergy Advisors Security Engagement (Pilot+) Overview

Within the **Synergy Advisors Security Engagement (Pilot+) [2-3 weeks]**, we offer a range of services aimed at enhancing your security readiness and optimizing the integration of Copilot for Security within your organization infrastructure.

### Scope

- Copilot for Security readiness
  - Evaluate your tenant in preparation for Copilot for Security deployment.
  - Review current usage and configuration within the Microsoft security solutions and its integration with Copilot for Security.
- Provision Copilot for Security with at least one (1) SCU provisioning and setup user RBAC.
- Evaluate and validate your use cases and requirements in a limited production environment (Pilot).
- Implement use case scenarios for up to four technologies/plugin-ins [Up to 3 use cases].
- Enable and configure required plug-ins.
- Implement one automation workflow for a use case scenario.
- Create and implement promptbooks based on use case scenarios [up to 3 promptbooks].
- Copilot for Security knowledge transfer sessions.
- Best practices for prompting and prompt enrichment (prompt engineering) with knowledge bases
- Copilot for Security usage monitoring during pilot phase, providing an estimation of SCUs required for production.
- Findings and recommendations.

### Deliverables

- **Knowledge transfer**
  - Describe recommended practices and lessons learned.
  - Review your current environment and identity requirements.
- **Working Sessions**
  - Solution design discussions
    - A high-level presentation about how Copilot for Security can achieve the unique security needs of the organization.
    - Synergy Advisors' recommendations.
- **Document Deliverables**
  - **Findings and recommendations.**
    - Of current platform configuration and its integration with Copilot for Security.
  - **High level design**
    - A presentation about how Copilot for Security can achieve the unique security needs of the organization.
  - **Implementation guide**
    - A step-by-step document outlining how to validate the identified use cases in the production environment.
    - Focus on specific requirements for your organization.

## What's Included in this engagement

As we delve into the realm of enhancing your organization's security posture, it's vital to grasp the array of services and support encompassed in our Synergy Advisors Security Engagement (Pilot+). Designed with a sharp focus on bolstering your security framework, this package signifies a significant stride towards unlocking the full potential of Microsoft Copilot for Security within your environment:

<p><b>Copilot for Security Readiness</b></p> <p>Assess the prerequisites, evaluate your tenant and maturity level with the Microsoft security suite and its integration with Copilot for Security, and evaluate regulatory requirements. This includes providing findings and recommendations to enhance readiness.</p>	<p><b>Evaluate and Validate Use Cases and Requirements</b></p> <p>We work closely with you to understand your specific requirements and use cases. This helps us tailor the engagement to your needs.</p>	<p><b>Implement Use Case Scenarios</b></p> <p>Implement use case scenarios for up to four core technologies/plugin, providing hands-on experience and practical knowledge.</p>	<p><b>Enable and Configure Required Plug-ins</b></p> <p>Assistance enabling and configuring the required plug-ins to implement and optimize the use case scenarios.</p>
<p><b>Implement Automation Workflow</b></p> <p>We help you leverage Copilot's automation capabilities to streamline your security processes, using a specific use case as an example.</p>	<p><b>Create and Implement Promptbooks</b></p> <p>Create and implement up to 3 promptbooks based on the use case scenarios, providing a practical guide for your specific requirements.</p>	<p><b>Copilot for Security Knowledge Transfer Sessions</b></p> <p>Conduct up to 4 knowledge transfer sessions to ensure the organization has a comprehensive understanding of Copilot for Security and its capabilities.</p>	<p><b>Best Practices for Prompting and Prompt Enrichment</b></p> <p>We provide strategies and best practices for prompting and prompt enrichment with knowledge bases, enhancing the effectiveness of Copilot for Security.</p>

## Additional information

- This Engagement is tailored for technical decision makers, and IT professionals.
- Experience in managing Microsoft 365/Azure Security solutions for cybersecurity incident management scenarios.
- Technical support and guidance will be provided throughout the Pilot session.
