

Synergy Advisors Security Engagement (Pilot+) for Microsoft Security Copilot

A next-gen AI-powered security solution for enhanced efficiency and capabilities: improve security outcomes at machine speed and scale.

Our Pilot+ extends Security Copilot scenarios beyond the core implementation available in our Pilot to empower your team to solve additional use cases and spend more time with our Security Copilot architects. Pilot+ also extends the scope of the engagement to include the Security Copilot standalone experience and understand how to build prompt books and workflows to solve more advanced use cases. If your team needs to tackle more strategic scenarios, Pilot+ can help you build a platform ready to address your toughest challenges.

Synergy Advisors Security Engagement (Pilot+) Overview

Accelerate your security readiness with the full breadth of Security Copilot experiences.

Scope

- Security Copilot readiness.
- Evaluate your tenant in preparation for Security Copilot deployment.
- Review current usage and configuration within the Microsoft security solutions and their integration with Security Copilot.
- Provision Security Copilot with at least one (1) SCU and configure user RBAC.
- Evaluate and validate your use cases and requirements in a limited production environment (Pilot).
- Implement use case scenarios for up to two technologies/plugins. [Up to 3 use cases].
- Enable and configure required plugins.
- Implement one automation workflow for a use case scenario.
- Create and implement promptbooks based on use case scenarios [up to 3 promptbooks].
- Security Copilot knowledge transfer sessions.
- Best practices for prompting and prompt enrichment (prompt engineering) with knowledge bases.
- Security Copilot usage monitoring during pilot phase, providing an estimation of SCUs required for production.
- Findings and recommendations.

Deliverables

- **Knowledge transfer**
 - Describe recommended best practices and lessons learned from real-world experience.
 - Review your current environment and identify requirements.
- **Working Sessions**
 - Solution design discussions
 - Learn how Security Copilot can achieve the unique security needs of your organization.
 - Synergy Advisors' findings and recommendations.
- **Document Deliverables**
 - Findings and recommendations.**
 - Our architects provide you with a full discovery of how to implement and operate Security Copilot to meet the immediate and future needs of the organization.
 - **High level design**
 - A presentation about how Security Copilot can achieve your unique security needs.
 - **Implementation guide**
 - A step-by-step document outlining how to validate the identified use case in the production environment.
 - Focused on specific requirements for your organization.

What's Included in this engagement

Designed with a sharp focus on bolstering your security framework, our Pilot+ offering delivers a significant stride towards unlocking the full potential of Security Copilot within your environment and the knowledge you need to solve future scenarios:

Security Copilot Readiness

Assess the prerequisites, evaluate your tenant and maturity level with the Microsoft security suite and their integration with Security Copilot, and evaluate regulatory requirements, including findings and recommendations to enhance readiness.

Evaluate and Validate Use Cases and Requirements

We work closely with you to understand your specific requirements and use cases, enabling our team to tailor the implementation to your unique needs.

Implement Use Case Scenarios

Implement use case scenarios for two core technologies/plugins, providing hands-on experience and practical knowledge.

Enable and Configure Required Plug-ins

Assistance enabling and configuring the required plugins to implement and optimize the use case scenarios.

Implement Automation Workflow

We help you leverage Copilot's automation capabilities to streamline your security processes, using a specific use case as an example.

Create and Implement Promptbooks

Create and implement up to 3 promptbooks based on the use case scenarios, providing a practical guide for your specific requirements.

Security Copilot Knowledge Transfer Sessions

Conduct up to 4 knowledge transfer sessions to ensure the organization has a comprehensive understanding of Security Copilot and its capabilities.

Best Practices for Prompting and Prompt Enrichment

We provide strategies and best practices for prompting and prompt enrichment with knowledge bases, enhancing the effectiveness of Security Copilot.

Additional information

- This engagement is tailored for technical decision makers and IT professionals.
- Experience in managing Microsoft 365 security solutions recommended.
- Technical support and guidance will be provided throughout the sessions.

Why choose Synergy Advisors as your strategic partner?

At Synergy Advisors, we not only provide consulting and managed services but also accompany you every step of the way on your journey to digital excellence across Microsoft products and our solutions (**E-Suite**), which amplify the power of your existing M365 and Azure investments. We are dedicated to driving your digital transformation, creating a more secure and efficient collaborative infrastructure. How do we achieve this? Through a unique blend of consulting expertise and managed services, we focus on your specific needs, offering comprehensive solutions that address both your security concerns and regulatory requirements.

Consulting Services

+12 years, +100 Top customers, and, with specializations in Security, Modern Work, Azure Data & AI, and Azure Infrastructure

We support our customers in the correct implementation of Microsoft solutions, aimed at improving their security postures and Modern Work, accompanied by a strategy that seeks to increase the adoption of these technologies and generate more upsell and cross-sell projects.

Managed Services

Leverage cybersecurity experts to review and monitor organizations' Microsoft 365 and Azure infrastructure and security. In-depth assessments of cloud applications, deployments as we help draft prioritized plans for improvements based on organizations unique security goals. Highly trained staff who monitor end-user activity through robust log analysis to provide you reliable monitoring, proactive and reactive incident response, and troubleshooting

Solutions (E-Suite)

Synergy Advisors' **E-Suite** seamlessly integrates various products with Microsoft 365, extending its features to address common advanced use cases encountered in organizations we've partnered with.

- E-Visor
- E-Visor Teams App
- E-Inspector
- E-Cryptor
- E-Vigilant
- E-Migrator
