AI AGENT GOVERNANCE

Instructor-led Hands-On Lab for Agent 365 governance

A technical evaluation stalled without practical proof

Agent sprawl and ownerless agents are already in the tenant, security is asking about oversharing and AI threats, and there is no safe place to test agent governance in Microsoft 365.

Slideware does not settle it. Your own admins need hands-on keyboard time to see how governance works, what its risks are, and what it can actually do.

Across the market, the size of that gap is already measurable:

BLIND SPOTS

82%

...discovered unknown agents in the past year

Cloud Security Alliance & Zenity, 2026 (n=445)

ACCESS CREEP

53%

...have had agents exceed their intended permissions

Cloud Security Alliance & Zenity, 2026 (n=445)

POLICY GAP

31%

...have formally adopted an agent policy

Cloud Security Alliance & Zenity, 2026 (n=445)

Before you commit, your team has to see it work.

That is what our E-mmersion experience delivers, on the most common use cases and with an expert beside your team.

Introducing Synergy Advisors Agent 365 E-mmersion

E-mmersion is the instructor-led Hands-On Lab Synergy Advisors built for this moment: an expert-guided Agent 365 lab where your team completes discovery plus up to 3 of the most common use cases, configured, validated and operated hands-on.

It exists because a demonstration rarely settles a real decision. Your own team configures, validates and interacts with the technology itself. Built for AI and identity admins, agent owners and cybersecurity teams at Level 300 (TDM), in person or remote – the next page details how the lab runs.

- Lessons from the field: real-life experience validating the most common Agent 365 use cases, not a scripted demo.
- Expert guidance throughout the lab, answering your team's own questions as they come up, in real time.
- How governance works, where its risks sit and what it can actually do, seen in real scenarios.
- Runs in a preconfigured lab environment, with no setup, no risk and no changes in your own tenant.

Agent 365 (A365) – Key Use Cases

CORE

Observe Agents and Prevent Sprawl
Consolidated view of every agent across platforms, with ownerless and at-risk agents spotted

Onboard Agents with Least-Privilege Access
Approval templates, Entra Access Packages, sponsor validation and Conditional Access

Govern Agent Tools
Govern tools invoked by agents that access different resources or apps, like Outlook and SharePoint, with every action audited

Protect Against Data Oversharing and Risk
Purview DSPM for AI, DLP and Communication Compliance over agent access to sensitive data

Defend Against AI Threats and Vulnerabilities
Prompt injection incidents investigated, compromised agents contained, MCP tools hunted

Audit, Compliance, and Agent Lifecycle
Audit trail exported, non-compliant agents blocked or deleted, records held under retention

Discover and Control Local AI Agents
IDE extensions, CLIs and code editors running as local agents detected on managed devices, unapproved ones blocked with Intune

BETTER TOGETHER

Agent 365 + Defender for Endpoint
Endpoint agents discovered and investigated

Agent 365 + Microsoft Sentinel
Detection, hunting and incident response

Agent 365 + Defender for Cloud
Grounding data and attack path risks

THIRD-PARTY AGENTS

LangChain
Brought under Agent 365 governance and lifecycle

LangGraph
Onboarded with the SDK, same observability and controls

Google ADK
Registered with the SDK, identity, owner, and full observability

Amazon Bedrock AgentCore
Connected platform plus deep integration by our experts

E-mmersion (Instructor-led Hands-On Lab) Experiences

BASE EXPERIENCE

Up to **3h** PER SESSION

Up to **3** USE CASES

EXTENDED SCOPE (PLUS)

Up to **8h** PER SESSION

Up to **5** USE CASES

Base Experience

- ✓ Instructor-led lab: configure, validate and interact directly with the technology
- ✓ Discovery plus up to 3 of the most common use cases, guided by an expert
- ✓ Hands-on keyboard time for your own team, not a demonstration

Extended Scope (Plus)

- ✓ Everything in the base experience, over an extended instructor-led lab
- ✓ Discovery plus up to 5 of the most common use cases
- ✓ Third-party agent and Better Together scenarios configured hands-on

Scope & Deliverables

Base Experience

IN SCOPE

- ✓ Instructor-led lab, up to 3 hours
- ✓ Discovery plus up to 3 common use cases
- ✓ Hands-on configuration and validation by your team

OUT OF SCOPE

- ✕ Changes to production or test environments
- ✕ Custom development

DELIVERABLES

- Session debrief with observations and recommendations
- Operating model, key learnings and roadmap

Extended Scope (Plus)

IN SCOPE

- ✓ Extended instructor-led lab, up to 8 hours
- ✓ Discovery plus up to 5 common use cases
- ✓ Third-party agent and Better Together scenarios

OUT OF SCOPE

- ✕ Changes to production or custom development
- ✕ Long-term lab access after the session

DELIVERABLES

- Session debrief with observations and recommendations
- Operating model, key learnings and roadmap

NEW · THIRD-PARTY AGENTS

Agent 365 beyond Microsoft

AWS, Google Cloud, LangChain, and LangGraph agents, governed in the same Agent 365 control plane as Copilot. Our experts validate and extend what Agent 365 covers out of the box, so every agent meets five conditions.

PLATFORM	DISCOVERY	IDENTITY	SECURITY PROTECTION	DATA PROTECTION	TELEMETRY
Amazon Bedrock AgentCore AWS	Out of the box	Not covered	Partial	Not covered	Partial
Google ADK Gemini Enterprise Agent Platform	Out of the box	Not covered	Partial	Not covered	Partial
LangChain Open source	Not covered	Not covered	Not covered	Not covered	Not covered
LangGraph Open source	Not covered	Not covered	Not covered	Not covered	Not covered
With Synergy Advisors experts Agent 365 SDK · Entra Agent ID Purview · OpenTelemetry	Validated & extended	Validated & extended	Validated & extended	Validated & extended	Validated & extended

Out of the box — Native in Agent 365 (registry sync)
Not covered — Needs Agent 365 SDK integration
Partial — Read-only signals, no code-level controls
Validated & extended — Integrated and tested by our experts

Source: Synergy Advisors, Agent 365 E-xperiences portfolio V.1.7 (slide 47); Microsoft Learn, Connected platforms in Agent 365.

Microsoft delivers, Synergy Advisors extends

Discovery	Every agent registered in Agent 365, with an accountable owner and sponsor.
Identity	Its own Microsoft Entra Agent ID and risk-based Conditional Access.
Security protection	Defender Advanced Hunting and Microsoft Sentinel, one SOC response.
Data protection	Purview DLP checks every prompt and response in real time.
Telemetry	Who uses each agent, how often, and how much, with OpenTelemetry.

On AWS and Google Cloud: from visibility to enforcement

Agents stay where they run. On Google Cloud, ADK callbacks send prompts to Purview.

LEVEL 1

Connected visibility

- ✓ The agent appears in Agent 365
- ✓ Activity synced from Amazon CloudWatch
- ✓ Operations in Defender Advanced Hunting

LEVEL 2

Deep integration

- ✓ Real-time Purview DLP on every prompt
- ✓ Sensitive content blocked
- ✓ DLP evidence in Activity explorer

New · E-mmersion Dev Track

A hands-on lab for developers and platform teams (level 400): onboard LangChain, LangGraph, and Google ADK agents with the Agent 365 SDK, Entra Agent ID, and least-privilege access.

Up to 4 hours (up to 8 in Plus) · In person or remote · English or Spanish · Preconfigured lab, no setup in your tenant

Coming next: more agent platforms and MCP server governance in Azure.

SYNERGY ADVISORS

E-mmersion

How the lab runs

01

Kickoff

Agent 365 introduced as the enterprise control plane.

02

Observe

Registry, Agent Map, inventory, dependencies, and posture.

03

Govern

Approvals, ownership, access management, and lifecycle workflows.

04

Secure

Oversharing, DLP events, identity risk, and prompt injection.

05

Identify

Common use cases and governance opportunities discussed.

06

Recommend

Operating model, key learnings, and the roadmap ahead.

A Portfolio of Experiences, One Governance Journey

ALIGN & DESIGN

Create alignment and agree on the target model

E-nsights

E-nvision

EXPERIENCE & PROVE

Show it works, then prove it in a dedicated lab

E-mmersion

VALIDATE & DECIDE

Validate functionality before production

E-valuation

PILOT & SCALE

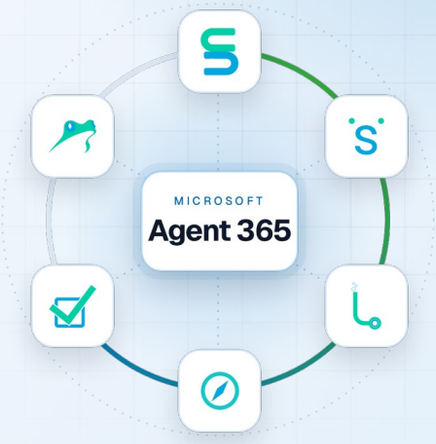

Move to production and extend governance

E-Scuba

One Session, and the Decision Stops Being a Guess

E-mmersion is a hands-on lab: in one guided session, your admins configure and test the most common Agent 365 use cases in a safe environment, guided by our experts.

Instead of watching a demo, your team sees governance working end to end, from onboarding to audit, and learns what adopting it would really take.

Let's take the next step together.
