AGENT GOVERNANCE

Validate Agent 365 in a controlled production environment

Tested scenarios and evidence to authorize agent usage with A365

You know which Agent 365 capabilities matter to you, but you haven't yet confirmed how your agents behave under governance: predefined scenarios must be validated in a controlled environment.

To expand adoption you need confirmed evidence across the full cycle — discovery, governance, security, identity and data protection — with your own agents and your change management process.

Across the market, the size of that gap can already be measured:

BLIND SPOTS

82%

…found unknown agents in the past year

Cloud Security Alliance & Zenity, 2026 (n=445)

EXCESS ACCESS

53%

…had agents that exceeded their intended permissions

Cloud Security Alliance & Zenity, 2026 (n=445)

POLICY GAP

31%

…have formalized an agent policy

Cloud Security Alliance & Zenity, 2026 (n=445)

Validate functionality and an agentic risk baseline before scaling.

That is what our E-valuation experience delivers: a predefined set of scenarios validated against your own requirements.

E-valuation: validate Agent 365 before scaling adoption

E-valuation validates Agent 365 in a controlled production environment through predefined scenarios, configured and tested against your requirements. The engagement confirms functionality and establishes a baseline for managing agentic risk before broader adoption.

The validation covers the full cycle — discovery, governance, security, identity and data protection — and documents findings, adjustments and priorities. It is aimed at security, IT and workload leaders at Level 300 (TDM), delivered remotely or hybrid.

- A controlled scope to reduce uncertainty, anticipate impacts and validate behavior before scaling.
- Expert judgment to define configuration, governance controls and best practices for your operating context.
- Predefined scenarios, tailored to your requirements and validated with evidence of function and control.
- Documented results, a prioritized plan and an executive readout to define scaling conditions.

Agent 365 (A365) — Production pilot use cases

CORE

Observe Agents and Prevent Sprawl
Consolidated view of every agent across platforms, with ownerless and at-risk agents spotted

Onboard Agents with Least-Privilege Access
Approval templates, Entra Access Packages, sponsor validation and Conditional Access

Govern Agent Tools
Govern tools invoked by agents that access different resources or apps, like Outlook and SharePoint, with every action audited

Protect Against Data Oversharing and Risk
Purview DSPM for AI, DLP and Communication Compliance over agent access to sensitive data

Defend Against AI Threats and Vulnerabilities
Prompt injection incidents investigated, compromised agents contained, MCP tools hunted

Audit, Compliance, and Agent Lifecycle
Audit trail exported, non-compliant agents blocked or deleted, records held under retention

Discover and Control Local AI Agents
IDE extensions, CLIs and code editors running as local agents detected on managed devices, unapproved ones blocked with Intune

BETTER TOGETHER

Agent 365 + Defender for Endpoint
Endpoint agents discovered and investigated

Agent 365 + Microsoft Sentinel
Detection, hunting and incident response

Agent 365 + Defender for Cloud
Grounding data and attack path risks

THIRD-PARTY AGENTS

LangChain
Brought under Agent 365 governance and lifecycle

LangGraph
Onboarded with the SDK, same observability and controls

Google ADK
Registered with the SDK, identity, owner, and full observability

Amazon Bedrock AgentCore
Connected platform plus deep integration by our experts

E-valuation experiences (limited pilot: test / production)

BASE EXPERIENCE

Up to **8** SESSIONS — MAX **4** WEEKS

Base Experience

- ✓ Predefined scenarios validated in 4 weeks maximum
- ✓ Functionality validated against your requirements
- ✓ Validation results, plan and executive readout

EXTENDED SCOPE (PLUS)

Up to **10** SESSIONS — MAX **5** WEEKS

Extended scope (Plus)

- ✓ The same validation, up to 5 weeks
- ✓ Documented implementation and configuration plan for production
- ✓ The plan is reviewed with your team, plus an operations guide

Scope and deliverables

Base Experience

IN SCOPE

- ✓ Validation of predefined scenarios
- ✓ Up to 8 sessions over 4 weeks
- ✓ Functionality validated against your requirements
- ✓ Expert review of configuration and governance

OUT OF SCOPE

- × Isolated lab environment
- × Additional changes in production or unrelated workloads
- × Development scenarios or custom integrations

DELIVERABLES

- Validation report
- Production implementation plan
- Executive readout

Extended scope (Plus)

IN SCOPE

- ✓ Validation of predefined scenarios
- ✓ Up to 10 sessions over 5 weeks
- ✓ Production plan documented, not applied
- ✓ Plan reviewed with your team

OUT OF SCOPE

- × Isolated lab environment
- × Changes applied in production or unrelated workloads
- × Development scenarios not listed

DELIVERABLES

- Validation report
- Production configuration plan
- General operations guide

NEW · THIRD-PARTY AGENTS

Agent 365 beyond Microsoft

AWS, Google Cloud, LangChain, and LangGraph agents, governed in the same Agent 365 control plane as Copilot. Our experts validate and extend what Agent 365 covers out of the box, so every agent meets five conditions.

PLATFORM	DISCOVERY	IDENTITY	SECURITY PROTECTION	DATA PROTECTION	TELEMETRY
Amazon Bedrock AgentCore AWS	Out of the box	Not covered	Partial	Not covered	Partial
Google ADK Gemini Enterprise Agent Platform	Out of the box	Not covered	Partial	Not covered	Partial
LangChain Open source	Not covered	Not covered	Not covered	Not covered	Not covered
LangGraph Open source	Not covered	Not covered	Not covered	Not covered	Not covered
With Synergy Advisors experts Agent 365 SDK · Entra Agent ID Purview · OpenTelemetry	Validated & extended	Validated & extended	Validated & extended	Validated & extended	Validated & extended

Out of the box — Native in Agent 365 (registry sync)

Not covered — Needs Agent 365 SDK integration

Partial — Read-only signals, no code-level controls

Validated & extended — Integrated and tested by our experts

Microsoft delivers, Synergy Advisors extends

Discovery	Every agent registered in Agent 365, with an accountable owner and sponsor.
Identity	Its own Microsoft Entra Agent ID and risk-based Conditional Access.
Security protection	Defender Advanced Hunting and Microsoft Sentinel, one SOC response.
Data protection	Purview DLP checks every prompt and response in real time.
Telemetry	Who uses each agent, how often, and how much, with OpenTelemetry.

On AWS and Google Cloud: from visibility to enforcement

Agents stay where they run. On Google Cloud, ADK callbacks send prompts to Purview.

LEVEL 1

Connected visibility

- ✓ The agent appears in Agent 365
- ✓ Activity synced from Amazon CloudWatch
- ✓ Operations in Defender Advanced Hunting

LEVEL 2

Deep integration

- ✓ Real-time Purview DLP on every prompt
- ✓ Sensitive content blocked
- ✓ DLP evidence in Activity explorer

New · E-mmersion Dev Track

A hands-on lab for developers and platform teams (level 400): onboard LangChain, LangGraph, and Google ADK agents with the Agent 365 SDK, Entra Agent ID, and least-privilege access.

Up to 4 hours (up to 8 in Plus) · In person or remote · English or Spanish · Preconfigured lab, no setup in your tenant

Coming next: more agent platforms and MCP server governance in Azure.

SYNERGY ADVISORS

E-valuation

How the sessions work

01

Define scope

You agree on the environment, objectives and success criteria.

02

Validation in a limited pilot

Configures and validates predefined scenarios in the lab.

03

Review controls

Validates configuration and controls against best practices.

04

Functional testing

Functionality and scenarios are validated against your requirements.

05

Rank impact

Prioritizes results by impact and production readiness

06

Report and close

Validation results and the production plan are presented.

Experience portfolio: a governance journey

ALIGN, IDEATE

Build alignment and agree on the target model

E-nsights

E-nvision

TEST AND PROVE

Demonstrate and prove in a dedicated lab

E-mmersion

E-xplorer

VALIDATE AND DECIDE

Validate functionality before production

E-valuation

PILOT — SCALE

Move to production and scale governance

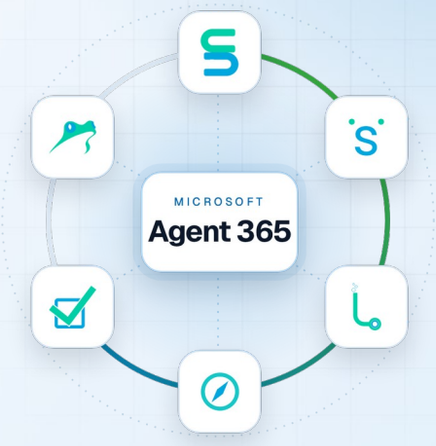

E-Scuba

Decide on the move to production with risk assessed

You move to production knowing exactly how your agents behave, where the risk is and what you need to govern them at scale.

Less uncertainty and fewer surprises; investment focused where it reduces risk most.

Let's take the next step together.
